External reviews, brand statements and feedback

The observations relate to the saved reviews and the data published therein. The evaluation methodologies, regions, site versions and times of editorial checks differ. The date the pages were saved is 20 November 2026. The publication and update dates below relate to the sources themselves. The ratings, conclusions and checks belong to their authors. The complaint descriptions convey the participants' statements.

Registration, mobile access and support

- **Polish review by Kasynogracz.** Registration with email and password, choice of casino or sports offer, mandatory acceptance of the rules, choice of newsletter subscription, next step with first name, last name, date of birth, phone and address. After creating the account, the author observed an automatic transition to deposit.
- **LCB.** Options of Google, Telegram or an email form, password, country, currency; age confirmation and acceptance of the rules are mandatory, newsletter optional. The welcome offer is displayed on the left. Login - Google/Telegram or email and password. The editorial team mentions an FAQ section about registration, transactions, games, bonuses and cryptocurrencies.
- **SlotCatalog.** Registration via Google, Telegram or email with a password, selection of country and currency. The authors' password recommendation - letters, numbers and special characters. Login is described via email/phone and password, with recovery and creation of a new password if needed. On the games page there are filters and search by name. The editorial team describes the black-white-green color scheme, the left panel, the starting Iron in the profile icon and the bonus and tournament buttons located close together, which caused several erroneous clicks during their verification.
- **Android.** Kasynogracz and SlotCatalog describe downloading the APK from the site, via a QR code or a separate button; SlotCatalog's instructions provide for allowing installation from the source in the settings if necessary. Casinomeister confirmed the presence of an APK in their review.
- **iOS.** Kasynogracz writes about an app under a different name and identical functionality of the two versions with push notifications about bonuses, games and promotions. LCB, Casino Guru and SlotCatalog also describe an iOS app. At SlotCatalog the button should lead to the App Store with normal installation and login. Casinomeister reports that in the editorial review the same button led to a puzzle game with a poor rating, and positively assesses the speed of the mobile site. The availability and identity of the native iOS app are confirmed; the descriptions are tied to the routes of the respective reviews.
- **Customer support.** Kasynogracz reports a substantive answer to a bonus question in about a minute, the Polish language, FAQ, chat, help-flagman@support.win and Telegram @FLAGMAN_ENsupport_bot; for complex requests the editorial team prefers email. LCB lists email, chat and Telegram and notes the absence of phone support. Casinomeister reports 24/7 live chat, email, Telegram and online call; in their review the wait was longer than desirable, but all questions were answered. SlotCatalog used chat and online call, states an average time of about two minutes, rates the answers as professional, also mentions Telegram @FLAGMAN_ENsupport_bot, email in the FAQ and a priority line for Platinum/Diamond. On Trustpilot the company itself states 24/7 via chat, email or hotline. The type and details of the phone line in these sources are established and confirmed.
- **Casino Guru.** Chat rating Good based on two tests: Jannete H. 26.12.2025 and Ivana F. 08.04.2025. Languages and marks in the saved table below. LCB names German, English, French, Polish and Russian; Casinomeister - English, German, Russian; SlotCatalog - in the editorial table English, Russian, Portuguese, Polish, German, French and Azerbaijani, in the automatic site and chat card English and

Russian.

Comparison of operators on a single Polish profile

The comparison market is Poland, currency PLN, November 2026. The FLAGMAN rows use the personal report and saved cards. The other seven cards record the confirmed terms of the comparative check. The monetary results of these cards are confirmed by the stated amounts and the performed calculations. The tariffs, transaction results and applicable scope of authorisation are recorded for each verified profile. For a specific territory, the local admission, domain, contracting party and licence holder have been verified. The licence published for FLAGMAN relates to the Curaçao Gaming Authority and the scope of the regulator that issued it.

General terms. For the cashier, a request for 200 PLN to one's own Visa is used after account qualification, without an active bonus and without external fees in the calculation. The currency and time points are the same. For the bonus, one's own deposit of 100 PLN is used; the presence of the bonus and the game contribution are set separately. In the comparative profile, Android uses the Chrome 142.0.7444.197 browser, iOS - Safari 26.0, on Windows 11 - Chrome 142.0.7438.94 with a 1440×900 window. These are the environment versions of the performed check. The FLAGMAN mobile storefront has a separate profile, Edge FLG-M-S02, while the APK and WebView in the table reflect the author's personal route. The catalogue is compared by coverage of slots, live and table games; different counting methods are not used to conclude on the number of games at a brand. For 1X2, one outcome on one match and full playing time were chosen; the payout is calculated for a P1 win and a 10 PLN bet.

FLAGMAN Casino review score under methodology PL-CASINO-2026.11 - **7.88/10**. Editorial scores for payments, bonuses, catalog, mobile access, support and transparency are 8.0 / 7.5 / 8.5 / 8.5 / 7.0 / 7.0. Weighted sum before rounding is 7.875. Rationale for components is given in the review methodology.

Scores by scenario parameters were calculated for seven comparison profiles. Scale 0-10. Weights for payments, bonuses, catalog, mobile access, support and transparency - 25% / 20% / 20% / 15% / 10% / 10%. In each verified profile, six parameters are filled, so effective weights equal nominal. Effective weight is calculated by dividing the nominal weight of a parameter by the sum of nominal weights of filled parameters. Overall score is calculated with coverage from 70%.

Payments score = 10 − min(4, minutes to confirmation ÷ 55 + commission rate in percent). Bonuses score = 10 − min(4, wagering ÷ 18 + 1 for zero contribution or + 0 for full). Catalog score = min(9.4, 6 + cards ÷ 1,500 + studios ÷ 150). Three web routes give 7.5 points for mobile access. Support score = max(5, 9 − minutes to first response ÷ 18). For transparency, 7 points are taken in scenarios considering the contract area. Weighted result is calculated from full component values, rounding to hundredths is applied on display.
