Cryptocurrency payments and wallets

Crypto assets, networks, payment routes and wallet requirements

Cryptocurrency

How do I deposit?

1. Go to the “Deposit” section, select the cryptocurrency option, and choose your preferred token.
2. Use the cryptocurrency converter to enter the amount you want to deposit in fiat. The system will instantly display the equivalent amount in your selected cryptocurrency.

Note: The exchange rate updates every few minutes.

3. Initiate the transaction using one of the following methods:

• QR Code - If you’re depositing from a computer, open your exchange account or wallet app on your phone, scan the QR code displayed on the screen, and send the required amount. (If you’re depositing from a phone, use the wallet address method instead.)

• Wallet Address - Copy the wallet address shown in the “Deposit” section and paste it into your exchange or wallet app to transfer the required amount.

Important: Always double-check the wallet address before each new deposit, as it may change!

How do I withdraw my winnings?

1. Go to the “Withdraw” section, select the cryptocurrency option, and choose your preferred token.
2. Enter the payout amount and your crypto wallet address.

Transactions are usually processed quickly, as we apply the highest available network fee.

Important: Each token may support multiple networks (e.g., ERC-20, TRC-20), and the network you select must match your wallet. Always double-check both the wallet address and network before confirming a withdrawal. Transactions cannot be cancelled or reversed if sent to the wrong address or network.

Cryptocurrency cashier - Main parameters

Parameter	Value
Availability of crypto payments	The Polish author's route lists USDT TRC20 and Bitcoin minimums for incoming funds. Terms allow crypto withdrawal to one's own wallet given a prior crypto deposit, play with these funds and a win.
Assets and networks	USDT - TRON/TRC20 for top-up per the author's minimum, the operator catalog contains TRC20 for withdrawal too. BTC - Bitcoin network per the reference for both directions. Eligibility for operations is checked in the profile's cashier.
Deposit networks	In the selected route, USDT is TRC20 only; the general reference contains separate USDT ERC-20, BEP-20, Arbitrum, Solana and TON, which are not substituted into a TRC20 address.
Withdrawal networks	The payments catalog describes the TRC20 recipient address separately for USDT withdrawal. For a specific Polish account, the network choice is visible in Withdraw and must match the wallet's network.
Min. deposit	50 PLN - the Polish cashier minimum for USDT TRC20 per the author's record. The general technical description of the gateway states at least 5 USDT per transfer; this is a different threshold level.
Max. deposit	The USDT TRC20 limit per top-up is set by the current Deposit form. In the verified operation, 20.00 USDT per single operation is used; this amount is recorded in the operation and is considered separately from the maximum limit.
Min. withdrawal	For USDT TRC20, the amount of the accepted request is set by Withdraw and the network tooling. In the general reference, Bitcoin withdrawal separately has a minimum transfer of 0.0001 BTC; it does not carry over to USDT.
Max. withdrawal	Terms state 1 000 000 USD per month for IRON/SILVER/PLATINUM for cryptocurrency payouts, DIAMOND without a stated status monthly limit. The single limit of the selected pair is tracked in the Withdraw form.
Fees	FLG-M-P02: 20.00 USDT sent and credited, own wallet fee 0.84 USDT paid on top of the transfer, operator/recipient fee 0 USDT in the calculation.
Confirmations and crediting	USDT TRC20 verification confirms crediting after 20 network confirmations. In the cashier, network and balance states are tracked separately; the window depends on confirmations and processing.
Conversion	With a USDT balance, the verified route does not use FX. When paying from a fiat source amount, Deposit calculates the token equivalent and updates the rate every few minutes per the FAQ; Terms separately stipulate a markup to Open Exchange Rates.
Address requirements	Verify the current TRON address from the form and the network on your own wallet. In FLG-M-P02, a TRC20 address without memo is selected, and for other assets the fields of their routes apply; the address may change for a new request.

Cryptocurrency cashier - Additional parameters

Parameter	Value
Bonus eligibility	The USDT TRC20 cashier minimum in the Polish profile is 50 PLN, numerically equal to the Welcome Bonus threshold, but eligibility depends on the first qualifying deposit and the promotion card. For a separate USDT balance, the Welcome Bonus card states a threshold of 20 USDT and a cap of 300 USDT.
