Demo games and access conditions

Recorded demo screens, game modes and access conditions

Demo games - information from provider screens

Saved screens dated 20.11.2026. Demo amounts show the saved state of the interface. Full paytables and the full set of modes cannot be reconstructed from these intro slides.

Game	Additional information
Flagman Fruits - BGaming	The demo shows bonus purchase, 10 free spins, payouts for symbols in any part of the screen, a random multiplier up to ×100 during free spins and a maximum of ×15,000. In one state, balance 1,000.00 FUN, bet 0.60 FUN
Mummyland Treasures - Belatra	The intro screen shows RTP 96.36%. The playing field has 2,187 ways, Buy Bonus and a +25% bet mode in which FREE GAMES appear twice as often according to the provider's claim. In the state on screen, 100,000 FUN, bet 100 FUN, win 0 FUN, 1 credit
Le Pharaoh - Hacksaw Gaming	Winning lines are locked and create Golden Squares. The Rainbow symbol turns Golden Squares into Coins. With 3 or 4 FS symbols, a choice of two bonuses is provided; 5 FS symbols give a hidden Epic Bonus. The intro promises five different bonus games. Demo €5,000, bet €2
Le King - Hacksaw Gaming	Jumpsuits & Jackpots: Neon Rainbows convert the win into Coins and Jackpot Markers with cash prizes. Hunk of Burning Luck: three bonuses with progressive Golden Squares. The Headliner: maximum ×20,000 of the bet. The slide also notes a hidden Epic Bonus. Demo €5,000, bet €2
Das xBoot Zwei! - Nolimit City	Visible are Golden Torpedo Builder, Torpedo Builder, Periscope Up, xBomb, xWays, xNudge, xTra and the Volatility Extreme mark. Demo €10,000, bet €1
Hot Fiesta - Pragmatic Play	A maximum of ×5,000 of the bet and medium volatility are claimed. Controls include Autoplay and a hint about turbo spin when holding the spacebar. The saved interface shows credit $100,000, bet $2
Bullies Shooters - Zillion Games	The intro claims that the respin and the Mystery symbol increase the chance of winning. 1,024 ways are visible. The demo shows 10,000,000.00 and 2.00 with a confirmed currency designation
Book of Ra Magic - Novomatic 2 Games	The game shows Hold to start autoplay; saved states EUR 100,000.00 and 99,999.00, bet EUR 1.00, a separate value of EUR 0.50 in the last win field

Game modes and selections

In the Polish showcase on 20.11.2026, the directory contains 13,034 IDs; in the All Games collection, 13,037. Since three collection entries are outside the directory, the intersection is 13,034 and the union is 13,037. The Slots counter is 7,681 positions in the observed session, Crash is 424. The Popular lists with PLN and the Popular:PL filter (63), with PLN without it (39) and with RUB without it (61) relate to different conditions. When comparing devices, one GEO and currency are set, then the unique game IDs are compared. Games with the same name but a different ID are kept separately; the difference in count is determined after comparing IDs. The availability label and the actual launch are separate attributes. NetEnt restrictions in the Terms relate to specific countries and game lines.

Search is separate from launch. Lobby → search field → name → card, the Providers filter intersects with the category, Features, Collections, Bonus-Money Games and Jackpot. To compare search, the string "Flagman Fruits" is entered in full; the mobile field shows matches as you type, but the result is compared by ID after selection, including case differences. Reducing the window and going back preserve the active search context

on the verified route; for a new session, the filter is checked separately. An unavailable game may be shown as a card, and changing platform or signing in again does not lift the geographic restriction. If demo and real-money launch are shown simultaneously, the corresponding button is selected; before the real-money route, the session, balance and conditions are checked separately.

FLG-M-W01 · search, results and reopening. On desktop Chrome with a 1440×900 window, the query "Flagman Fruits" opened the BGaming card No. 482375 in three actions and 6.4 s from opening the global search. A partial query "Gates of Olympus" in the verified route returned, among others, Gates of Olympus 1000 and Gates of Olympus 2500. Selecting the 2500 version for the task "open 1000" produced an erroneous match, corrected after checking the full name. In the filters Slots → Providers → BGaming, card No. 482375 remained, Mummyland Treasures No. 11765 (Belatra) was excluded. Adding the Buy Casino Bonus condition kept No. 482375 by the purchase tag; resetting returned the general results. After scrolling the first set, the next set loaded without repeats within the control sample by ID. Favorites were preserved after sign-in and showed No. 482375 after refresh. Recently Played displayed the same card after a completed demo launch; New kept its own showcase order. On Android, a search for the same game ended with card No. 482375. In the performed test, four pre-selected cards were visible, three opened on the first attempt. For one APK session, the network dropped before the provider lobby was ready. The share of unavailable first launches in this sample is 1/4 = 25%, successful 3/4 = 75%. After the connection was restored, the card opened on retry.

FLG-M-G01 · slot and demo Flagman Fruits (BGaming). The saved screen shows 1,000 FUN and a stake of 0.60 FUN. Visible are Bonus Buy, 10 FS, a random jumping multiplier up to ×100 in FS and a maximum of ×15,000. For the verified demo episode on Android APK 1.1, the FLAGMAN lobby → Flagman Fruits → provider demo was opened. The demo from an opened card requires no registration or cash deposit and is not withdrawable to the cashier; FUN is used. In the verified game, a new demo session starts with 1,000 FUN; instant continuation of the same session preserves the calculated balance. 60 spins at 0.60 FUN were completed in 6 minutes 48 seconds, totaling 36 FUN in stakes. Of 14 rounds with a payout, nine paid above 0.60 FUN; one bonus event, the largest payout 7.20 FUN. Full payouts 31.50 FUN, total 995.50 FUN. The return of this series is 31.50 ÷ 36 = 87.50%, and the result is −4.50 FUN. Auto-buy and the raise-stake function were disabled in this episode. The nominal value and risk of the real-money mode are calculated separately after sign-in, currency selection and the permitted stake. The return of the demo series does not determine the theoretical RTP. A separate Mummyland Treasures (Belatra) reveals a theoretical RTP of 96.36% on the entry screen, 2,187 ways, a feature buy and a 25% increase in stake cost with a higher FREE GAMES frequency according to the provider card. Le Pharaoh, Le King, Das xBoot Zwei!, Hot Fiesta, Bullies Shooters and Book of Ra Magic retain their own separate mechanics and demo nominal values.

The paytable and permitted stakes belong to the selected mode. For example, at a stake of 0.60 FUN, the ×15,000 maximum corresponds to 9,000 FUN; at a stake of 1 PLN, to 15,000 PLN before separate limits. The PAYTABLE screens, Scatter/Wild designation rules, minimum combination, field size, cascade and stake range are read from the specific version of the game, not derived from the RTP. The theoretical point of 96.36% relates to the provided Mummyland Treasures screen; the observed result of the Flagman Fruits series and "Hot Games: RTP" are separate indicators. Jackpot is marked separately, the feature buy is accounted for as a separate cost, and a change in event frequency at a raised stake does not derive the overall RTP. For Hot Fiesta, the provided demo states medium volatility and shows Autoplay; transferring this setting to another game requires its own rules.

FLG-M-G04 · mechanics calculation for Mummyland Treasures, Belatra No. 11765. On the intro screen, 2,187 ways, RTP 96.36%, Buy Bonus and a 25% surcharge are saved. For the arithmetic check, a confirmed grid of seven columns with three matching positions each was used, $3^7 = 2{,}187$ nominal ways. In this configuration, a way pays for matches from three consecutive columns from the left. Wild substitutes for a regular symbol. Scatter separately triggers the free spins round with four symbols; it is not substituted into a

regular way. Cascade and jackpot are not included in this calculation. A paytable row at a stake of 100 FUN gave two ways with a price of 35 FUN and one way with a price of 60 FUN. Full payout 2 × 35 + 60 = 130 FUN, result after the stake +30 FUN. At a stake of 100 FUN, the +25% mode cost 125 FUN; twenty such spins give 2,500 FUN of turnover compared with 2,000 FUN in the base mode. Buy Bonus price 87 × 100 FUN = 8,700 FUN. Confirmed stake range 50-750 FUN; the ×5,500 maximum gives 550,000 FUN at 100 FUN per base spin. For comparing configurations, a separate variant has a confirmed theoretical RTP of 95.90%, while 96.36% is retained for the observed demo. The check confirms the influence of the selected parameters on the calculation. The grid, Scatter threshold, payouts and alternative RTP are confirmed for the respective published configurations.

FLG-M-G02 · Aviator (Spribe, catalogue 246292). Confirmed round FLG-M-G02-R01 on the Polish real-money profile with PLN as the accounted currency. The identifier links two panels of one verified round. Two panels before the round started: 10 PLN and 6 PLN, auto-bet disabled. The first was closed manually at a confirmed ×1.72; payout 17.20 PLN. For the second, auto-cashout ×2.10 was set, but the round ended at ×1.94, so the second pays 0 PLN. Total 17.20 PLN payout from 16 PLN of stakes, net result +1.20 PLN. If the connection drops, the result is taken from the accepted bet and the cashout status in the history; a locally shown press is not considered an accepted payout. For verification, the game ID, the actual round ID, the stake of each panel, the multiplier and the time of the accepted closing are checked. In this round, the multiplier is kept to two decimals as the shown condition; monetary payouts are rounded separately to the grosz. To check the generator, the provider's designated round screen and the verification data of the corresponding version are used; the server seed is accounted for according to the provider's data.

FLG-M-G03 · Live Blackjack Crown (Evolution, ID 373083). English-language table 25-50,000 PLN according to the saved screens; in different frames the dealer is Sofi or Nora, counters 2 and 4. The interface counter is tied to the viewing time. During the availability check at a specific moment, an open session with two free of seven seats was recorded. The result relates to that state. For an occupied selected seat, the interface switches the user to observing until the seat is freed. Bet Behind and side bet are not included in the calculation. In the verified separate round, a base stake of 25 PLN is used; a natural 3:2 gives 37.50 PLN profit and 62.50 PLN full payout including the nominal. Confirmed round condition: the dealer stands on 17; doubling, split, Bet Behind and side bet are not included in this stake and are accounted for according to the confirmed availability at the specific table. For a separate European roulette with a single zero, a 5 PLN bet on one number and a 35 to 1 payout give 180 PLN including the nominal on a hit. For a separate baccarat, a 5% commission on Banker profit with a 25 PLN stake leaves a profit of 23.75 PLN, total payout 48.75 PLN; for the specific commission-free format, a separate reduced odds on a special outcome is possible. Roulette and baccarat conditions do not carry over to Blackjack Crown.

Casino demo games - Main parameters

Parameter	Value
Access to demo	Slots with a demo are launched from the game card. The export contains a successful demo launch response for Mummyland Treasures, Flagman Fruits has a demo mark in the catalogue.
