FLG-M-T01 · Lucky League. The saved edition of 20-27 November starts and ends at 12:00 UTC (13:00 for Warsaw in November). Minimum 2 EUR, counting of games from the Lucky League collection, ranking by multiplier; a separate opt-in was not required in the saved configuration. In the separate verified round, a full payout of 42 EUR at a stake of 2 EUR gives a qualifying multiplier of ×21. With a zero payout, the multiplier equals 0. In ranking, the main currency EUR must be kept, and the moment of converting funds from another currency must be recorded separately. The shown fund of 67,500 PLN reflects the published equivalent of 15,000 EUR, not an independent additional fund. The sum over a place range: (last − first + 1) × prize per place. Check: 1-5 = 7,300 EUR; 6-35 = 5,200 EUR; 36-100 = 2,500 EUR. According to the grid, 100 places give 15,000 EUR and 67,500 PLN. For 6th and 7th places, the fund of this range is 2 × 350 = 700 EUR. With the "prize" base, a ×3 wagering means 1,050 EUR of turnover per one prize winner. When multipliers coincide, positions from the snapshots are used as the observed order; the final result is determined by the state of the completed edition. The waiting period for the prize starts after finalization; processing times are not interpreted as the duration of the edition.

FLG-M-T02 · wheel, network campaigns and jackpots. In the available wheel sectors of the casino - FS, deposit percentages and jackpot; in sports - free bets, mini-jackpots and deposit percentages. In the verified single-attempt route, the addition of parts is tied to fulfilment of the active campaign condition, and used parts are deducted from the available balance after the spin. With 100 FS in a permitted sector and a selected denomination of 0.50 PLN, the calculated denomination is 50 PLN, without being added to the available cash balance. The bonus deposit multiplier is applied to the qualifying deposit; for the mini-jackpot a separate bet and currency are taken into account. BGaming Million Drops in the accepted row refers to the BGaming network campaign and its stages; the stage remainder equals the declared fund minus the prizes already awarded for that stage in the same currency. The jackpot of a specific game from the saved storefront is tied to its ID and snapshot currency; the operator's campaign and the displayed shared pool are not summed with it.

Club, points and Gems. Entry into FLAGMAN Club is automatic according to the operator's description; status features may require confirmation of email, phone, identity and first deposit. The IRON/SILVER/PLATINUM/DIAMOND tables and the FAQ memo are separated by version. In the FAQ, PLATINUM is activated at 200 within 30 days or 450 within 90 and is retained at 200 points per month, otherwise there is a transition to SILVER. DIAMOND - 350 within 30 days or 800 within 90; after a month without 350 there is a transition to PLATINUM. The current storefront structure shows overlapping ranges; its thresholds are not erased by the memo's thresholds. In the PLN profile, 50 PLN of deposits give 1 status point, 100 PLN of qualifying bets in slots - 1 Gem according to the store rule. 200 points are equivalent to 10 000 PLN of qualifying deposits under this formula, and 1 000 PLN of qualifying bets give 10 Gems. Gems have their own exchange for FS, deposit incentives and loot boxes. A personal manager is indicated for DIAMOND; the maximum payout and entitlement to the privilege depend on status and compliance with its conditions. A status from a linked brand is not taken into account in the Polish accounting of this club.

Support and dispute FLG-M-SP01. Live Chat, help-flagman@support.win and Telegram @FLAGMAN_ENsupport_bot represent the operator; 24/7 availability is stated for the brand's service. The contact was conducted in English. After the first substantive reply, 8 minutes later Telegram transferred the case to Live Chat; the total time until the adjustment was 36 minutes. For a dispute about a credit, the transaction ID, its submission time, the History of the bonus and coupon, the content of the reply and the exact adjustment of 50 PLN are retained. Reopening is appropriate if the credit is in the reply but not in the bonus history. On refusal, the

applicability of the full promo condition, an active alternative or non-fulfilment of the threshold are checked. The external route with an unresolved complaint goes from Customer Success through the administration to an independent body or the relevant regulator/licensee. Complaint materials and KYC confirmations are transmitted only through channels related to the specific dispute. For self-exclusion, a separate contact topic applies: a temporary or permanent request to support, confirmation of the restriction and retention of the correspondence, resumption only under the conditions of the chosen term and procedure.

Entities, authorisation and security. In the saved corpus of the operator, GALAKTIKA N.V. (140803, Curaçao), CGA OGL/2024/169/0146 dated 28.10.2024 and the payment organisation Unionstar Limited (HE 356131, Cyprus) are indicated. The operator's domain in the study is flagman.casino; the licensed scope is established from the validator card, while the display in the footer evidences the operator's statement as of the date of saving. For the validator, the exact addresses of CGA/GCB from the source excerpt apply. To contact the regulator, the CGA portal is used; the validity period, list of domains and status are taken from the relevant card, separately from the date of issue. The alternative Antillephone and Tobique are other versions of the corpus. France, the United Kingdom and the USA, among others, are listed in the Terms restrictions for opening an account, deposits and money bets; the language or regional badge of the cashier does not cancel this condition. The Polish interface and observations relate to technical accessibility in the described profile, while the legal status in a specific country has a separate scope.
