Author, methodology and editorial workflow

Review and assessment methodology

Control profile conditions - Poland, November 2026, PLN for comparable monetary amounts. The sources distinguish author observations, the state of front-ends/rules, independent reviews and confirmed episodes. Intervals are compared only between identical points: request → confirmation, confirmation → external receipt, first support response → resolution. Method availability, limit and the fact of payment are accounted for separately. The technical environment is tied to a specific route. When comparing products, the same market, currency, operation direction, mode and rounding method are applied. A monetary episode with a confirmed series of measurements retains the reported range; the average is assessed separately. Interface data and legal terms are compared with the confirmed results of personal verification.

Criterion	Weight	Basis in the FLAGMAN review
Payments	25%	Separate lists of methods, Visa / Mastercard / USDT TRC20 and BTC thresholds, observation of withdrawal confirmation
Bonuses	20%	Automatic crediting of the Welcome Bonus, 50 PLN threshold, ×45 coefficient, cap and withdrawal rules
Catalog	20%	Composition of categories, separate access modes, number of entries and providers found on dated snapshots
Mobile access	15%	Two mobile routes verified by the author, reported versions and Android APK data
Support	10%	Channels and escalation procedure, response time in independent reviews and results of a confirmed request
Transparency of terms	10%	Dated terms, operator details, scope of license applicability, timelines and reasons for additional verification

Each component is scored on a 0-10 scale. The total is the sum of score-weight products. Rounding to hundredths is performed after summing. FLAGMAN scores on the six criteria in the stated order - 8.0 / 7.5 / 8.5 / 8.5 / 7.0 / 7.0. Weighted sum 7.875, final review score 7.88/10. The values compare terms and verification coverage within the shared scope. Observations on other markets are given with their own terms.

Scope of the archived information

Topic	How to read the preserved data
License	The Polish footer and Terms with the update of 12.11.2026 refer to the shown agreement. Antillephone, Tobique and the variant of the Unionstar role are preserved as alternative CMS wordings. The number from the footer refers to the operator's statement, and the applicability of the license is determined by its jurisdiction
Sports and refunds	The sports conditions include sections 9 and 25 of the general Terms, the FAQ and the rules of individual promotions. The conditions of deposits, payouts, cancellation and refund are given in the general Terms
Cashier	The author's lists for Poland, the general configuration and external reviews describe different conditions. The personal withdrawal interval was measured before confirmation. For funds to arrive via the selected instrument, a separate provider timeframe applies
Catalog and promotions	Counters and prizes refer to the stated moment, market, currency and sample. Game introductions show separate mechanics and parameters of demo states
Apps	The personal report covers APK 1.1 and iOS WebView 7.32. The selection of external app store descriptions refers to their own routes. ZIP time and certificate date describe metadata, the build date has a different scope

Scenarios and calculations for the FLAGMAN review

Methodology and observation results

The subject of the review is FLAGMAN Casino, on the FLAGMAN screens and in the Flagman Android package. Viewing the operator's materials relates to flagman.casino. The editorial domain and the author's contact relate to a separate project. The basis of the review is the Polish profile as of 20 November 2026 and Rafał Nowakowski's personal check in November 2026. For the English-language international version of the editorial team, no GEO is assigned. The operator's interface languages, registration countries, account currencies and availability of a cashier method are described separately. For foreign profiles, the report uses the corresponding regional excerpts of rules and configuration. The author's actual user operations relate to Poland.

Materials are checked from the visible function to the conditions and the result. In the cashier, the stages 'request', 'confirmation', 'sending' and 'receipt' are handled separately. In the apps, APK installation, opening the iOS web container and viewing the mobile site are distinguished. In the games, the observed screen, the demo, the real-money mode and the calculation based on confirmed data are compared separately. The availability of each route is recorded for the corresponding profile. Local FLG-M codes link the verified episodes to their conditions and results. The amounts and intervals of these episodes are confirmed by the verification results.

Additional parameters of the verified profiles

The parameters below are confirmed in the verification episodes for Poland. The author's record, the official terms and the performed calculations constitute the approved base.

Login and account setup.

- In the verified profile FLG-M-A01, a password of at least 12 characters is used with letters of both cases, a digit and a special character. This is a confirmed requirement for the chosen password; the rules of the

form itself are determined by its hint.

- In the verified profile FLG-M-A01, 146 s from opening the filling of the Polish Sign up to email confirmation via the link; KYC and deposit proceed separately.
- In the verified profile FLG-M-A03, the link from the email is valid for 48 min from sending. For the operator's account, the term is determined by the text of the email.
- In the verified protective profile, 8 incorrect entries cause a 12 min pause; after the pause, a retry or reset is available. reCAPTCHA on the form was observed separately.

Game configurations and opening times.

- The minimum bet of the verified FUN profile is 50 FUN per spin in the base mode.
- The confirmed maximum bet is 750 FUN per single base demo spin. This is a confirmed boundary of the demo mode; the monetary range is determined by the card of another mode.
- In the verified FUN profile, the maximum payout is accepted as ×5500 of the base bet: at a bet of 100 FUN in demo mode this is 550000 FUN. The figure is confirmed by payout verification.
- For Mummyland Treasures in demo, the confirmed cost of the feature is 87 base bets: at 100 FUN this is 8700 FUN. In the interface of a separate version, the price is verified on the Buy Bonus confirmation, and the +25% mode is a separate setting.
- In the Aviator calculation FLG-M-G02, the window was open 7.2 s before the start of the round.
- In the verified Aviator PLN configuration: the eligible bet is from 1 to 195 PLN per panel, the confirmed payout limit is 13500 PLN per panel. In FLG-M-G02, the panels were accepted at 10 and 6 PLN.
- In the verified Aviator configuration, an RTP of 96.34% is accepted. This is a confirmed long-term parameter of the game; the result of a single round of FLG-M-G02 does not measure it.
- In the verified Aviator profile, the visible feed contains the last 16 rounds; a specific monetary transaction is verified in the history by round ID.
- In the verified profile Galaxy S26+ / APK 1.1 / Wi-Fi 5 GHz, 5.2 s from opening the Blackjack Crown card to the first stable frame of the stream.
- In the verified profile Galaxy S26+ / APK 1.1 / Wi-Fi 5 GHz, 3.75 s from pressing Demo in Flagman Fruits to the active spin button.

Acceptance of a sports coupon.

- Verified live coupon in PLN: 3.62 s from pressing Place with the market open to the accepted coupon appearing in My Bets. If the odds change, the count refers to the confirmed submission.

Methodology - Main parameters

Parameter	Value
Scope of testing	Two mobile journeys, making a deposit, the first automatic crediting of the Welcome Bonus and the withdrawal confirmation were tested. The catalogue, sports, support and rules are described on the basis of confirmed facts and completed calculations.
Testing method	The author's observations are compared with the storefronts, rules and independent reviews. Calculations are performed separately based on the input conditions; the observation result retains the device, country, currency and the start/end of the interval.
Sample and conditions	Poland, November 2026, PLN for comparable monetary amounts, two journeys: Android APK 1.1 and iOS WebView 7.32. The method lists contain 104 input records and 73 withdrawal records; this is a composition different from the number of transactions.
Scoring criteria	Payments, bonuses, catalogue, mobile access, support, transparency of terms.
Criteria weights	Payments 25%, bonuses 20%, catalogue 20%, mobile access 15%, support 10%, transparency of terms 10%. Total 100%.
Scale and final score	Scale 0-10. FLAGMAN's editorial scores across six criteria are 8.0 / 7.5 / 8.5 / 8.5 / 7.0 / 7.0. The weighted sum of 7.875 gives 7.88/10. For the seven tested profiles, scores were calculated based on the parameters of their scenarios.
Operator comparison	General profile of payment and sports comparisons - Poland and PLN. Payment direction, account status, mode and reference points are compared. The scores of the seven tested profiles show the result of the formulas under the given conditions. The FLAGMAN review score uses editorial observations and documents.
Limitations and corrections	The author's conclusion has 40-60 minutes until confirmation; the external crediting timeframe has a separate scope. Corrections are accepted by the author: support-info@flagmancasinoofficiali.com with the URL, fragment and basis.

Methodology - Additional parameters

Parameter	Value
Comparison market and currency	Poland, PLN. Values for other markets and currencies are given with their own conditions without substituting for PLN.
Collection period	November 2026 - the author's working period, two mobile journeys. The operator data snapshot of 20 November 2026 is a separate date, and the method lists have 104 input items and 73 withdrawal items.
Commercial relationship	The adopted configuration uses informational links. Partner transitions or paid materials are marked when they appear, and the score is calculated separately from commercial conditions.
