Sports and esports

Saved operator materials. The English-language sports betting section in PLN and Digitain widgets, archive from November 20, 2026. Odds, scores, match lists and counters changed during viewing.

Sports section and tools

- The Sports navigation shows quick links to EPL, LaLiga, Serie A, Bundesliga, Ligue 1, Ekstraklasa, ATP Finals, WTA 125, NHL, NBA, Euroleague, UFC and Formula 1. Other tournament selections are also present in regional configurations. The section has an Esports tab.
- The promo block showed Enhanced Odds with a countdown of 10 days 03 hours 34 minutes, Autumn Bet Race #3, Football: Early Victory (198), Hockey: Early Victory (222), Basketball: Early Victory, Early Refund (406), Accumulator of the Day, Accumulator Bonus, Cash Out and Edit Bet. The numbers are indicators in the session cards. The banners included a welcome Free Bet 500 zł on first deposit and "Up to 10% Cashback" received on Thursdays.
- Match of the Day: Bayern Munich - Koln, Germany. Bundesliga. The entry had the date 19.11.2026 20:00 UTC. The odds field of this banner is empty.
- In Esports, Favourites, Bet History, Bet Race, Results, Settings are visible. Event filters - All, Live, Upcoming, Outrights. The bet slip shows My Bets, Booked Bets, Booking ID and Load. An empty bet slip prompts you to select events. The settings retain fields for changing odds/argument, odds formats, date and time, quick amounts and Dark Mode; the saved rounding setting for the currency is 2 decimal places. The interface elements and the bet result are confirmed.

Sports

What is a bet?

A sports bet is a bet made between a user and the Sports Platform. The user makes their prediction and bets money on the outcome of a sporting event. If the prediction is correct, the user gets back the bet and the profit (winnings), otherwise the user loses the bet.

What is an event?

An event is an occurrence where the platform accepts bets before and during the occurrence.

What is a line?

A line is a list of events on which users can bet. The Sports Platform publishes a line of all their odds.

What is line betting?

Line betting is the number of variations of outcomes offered by the Sports Platform for one of the events in the line.

What is an outcome?

An outcome is the specific result of an event on which the user places a bet in order to guess it.

What is a double chance?

A double chance is a bet on two outcomes at the same time.

What is a live bet?

A live bet is a bet on an event that has already started. Live betting provides an opportunity to make a bet based on the current game situation in the match.

What is a pre-match and how does it differ from the live game?

A pre-match is an opportunity to place a bet before the event. The opposite of a pre-match is a live bet, made after the start of the event or while it is going on.

How do I place a bet?

1. Choose one or more events from those offered on the site.
2. Press the button with the outcome/result for your choice to appear on the coupon.
3. Specify the bet amount and press “Place”.

After this, the bet is considered placed and is displayed in the “My Bets” tab.

What is the “Quick Bet” mode and how do I activate it?

“Quick Bet” is a mode that allows you to make a bet without filling in a coupon. Once this mode is activated in the betting coupon, you will be able to make bets at the odds of the selected outcome in one press.

What is the minimum and maximum bet amount?

The minimum bet amount is 1 zł.

The maximum bet amount is set at the discretion of the platform.

How do I cancel a bet?

It is not possible to cancel a bet. If the bet was placed by accident, you can use the “Cash out” feature to return a part of your bet.

What is a “Cash out”?

The “Cash out” is an opportunity to settle a bet before the end of the event. If the probability of winning is low, the “Cash out” feature will allow you to refund a part of your bet in advance. If there is a high probability, you can take some of the potential winnings without waiting for the end of the match. The result of bet settlement depends on the current odds.

How do I use the “Cash out” feature?

The “Cash out” feature can be used when the bet is open. Go to “My Bets”, choose a bet and press “Cash out”. The amount of the cash out will be displayed in the bet details. Note that this feature is not always available. The “Cash out” feature is activated at the discretion of the Sports Platform.

What are the “odds” in sports betting?

Odds are a number offered by the Sports Platform to calculate potential winnings of a bet. For example, you bet 100 zł at odds of 1,85, and your winnings would be 185 zł.

This number is calculated by analysts working for sport betting companies, based on many factors and probabilities.

For example, the weaker the athlete or team, the greater the odds of their victory. Despite this, you should pay attention to the fact that in sports a potential outsider sometimes wins against a clear favourite.

There are several types of odds:

1. Decimal - used in most European countries.
2. Fractional. If you bet at an odd of 15/5, you get 15 zł on top for every 5 zł if you win. This number can be converted into decimal form: 15 + 5 = 20, 20 ÷ 5 = 4,0.
3. American. These odds have positive and negative values, such as “-105” or “157”.

What is an “Ordinary” bet?

The ordinary (or single) is the most popular type of bet. This is a bet on a single event with one possible outcome.

What is a Parlay?

A parlay is a bet on several independent outcomes at the same time. A parlay win is equal to the amount of the bet multiplied by the odds of all outcomes included in the parlay. A parlay wins only if all outcomes win out. If at least one outcome loses, the entire parlay is lost.

What is a Parlay System?

A parlay system is a bet on a combination of parlays for selected events. The number of parlays in the system depends on the number of outcomes in the system. The parlay system win equals the total amount of all winning bets in the system. If one of the selected outcomes turns out to be a losing one, the parlays containing that outcome will not be taken into account when calculating the winnings.

Let’s consider the 2/3 system as an example:

This system contains 3 independent outcomes:

Outcome 1

Outcome 2

Outcome 3

When settling this bet, all possible combinations of parlays for 2 outcomes will be checked. The bet amount of each parlay is equal to the bet amount of the system, divided by the number of parlays. In this example, there are three parlays with two outcomes in each:

Outcome 1 Outcome 1 Outcome 2

Outcome 2 Outcome 3 Outcome 3

When all the events are over, winnings on parlay events will be summed up and credited to the user’s account.

What does a “1x2” bet mean?

1x2 bets are odds on three possible main results of the match: a victory of the first team (V1), a victory of the second team (V2) or a draw (X). By placing this bet, you are betting that one of the teams will win or the result will be a draw.

What does a “Total” bet mean?

Total is a bet on the number of goals or points scored. The number is counted for the whole team as well as for an individual player. There are two types of totals in sports betting:

1. Total over. The bet will win if the players score more than a specific number of points.
2. Total under. A win will occur if the players score less than a specific number of points.

Depending on the conditions of the Sports Platform, the total can be counted for an individual player, a team or a result of the match.

What is a “Handicap” bet?

A sports bet with a handicap is possible if one team has a clear advantage. In this case, the Sports Platform may tighten the requirements for the bet to win.

The handicap takes away or adds points, goals etc. depending on the type of sporting event. The Sports Platform uses handicap to balance the chances to win and to attract more users.

In other words, the point of this option is to change the initial conditions so that one team can succeed more easily.

What is an “Asian Handicap” bet?

An Asian Handicap bet is a single bet that may be divided into 0,25. Half of such a bet can be calculated by winning or losing, and the other half is calculated at odds of 1,0.

What is an “Asian Total” bet?

Asian Total bet is a single bet, which differs from the traditional in its numerical value and in the way it is calculated. The main difference from the European handicap is the opportunity to get a refund for a part of the bet or half of the winnings. In the line bet, the Asian total either ends at ,25 and ,75, or is denoted as the sum of the two bets: (0,5; 1,0).

How is the bet calculated?

The bets are calculated after the results of a sporting event are published on official media resources. To calculate the amount of winnings the bet is multiplied by the final odds of the bet.

What is a bet on the main / extra time of the match?

In some sports such as soccer, hockey and basketball, extra time is possible after a draw. If there is no winner even after that, this is followed by a penalty shootout.

How is the bet calculated if the match is cancelled or interrupted?

If a match is interrupted or rescheduled and not resumed within 48 hours, bets are cancelled and the bet amount is returned to the user’s balance. Exceptions are cases where the outcome of the bet was already clearly defined at the time of stopping the game.

What is a bet refund?

A bet refund is the calculation of the bet at odds of 1,0. Thus, the user does not make a profit, but also does not lose money. Depending on the rules of the Sports Platform, bets on matches that were rescheduled, interrupted, cancelled etc. may be refundable.

What bonuses does the FLAGMAN Sports Platform offer?

There are a lot of various regular bonuses and promotions at the FLAGMAN Sports Platform. To keep up to date with all current offers, we recommend you to subscribe to our newsletters.

What is a Combo Boost?

A Combo Boost is bonus odds that increase the total winnings of your parlay bet of 3 or more events. It's very simple - the more events you add to the bet, the higher your winnings will be!

What is a free bet?

A free bet is a free of charge bet offered by the Sports Platform as a bonus.

You can place it as an ordinary bet: if you win, you get a net win, and if you lose, you only lose a free bet instead of real money. Your balance will remain unchanged.

How do I use a free bet?

1. Select the events and odds that correspond to the conditions of the free bet.
2. Press the gift icon in the coupon next to the field for the bet amount.
3. Confirm you want to use the free bet in the notification that opens and press the “Place” button.

How do I find the match I'm interested in?

To find the event you are interested in, use the search form on the **“Sports”** page and enter the name of the team taking part in the event or any other keyword related to the event.

Where can I watch the match/event broadcast?

You need just to log in to the site to view sports broadcasts. All events with broadcasts available are marked PLAY.

Where can I see the match/event statistics?

You can view the match statistics by pressing the appropriate icon in the upper right corner of the event.

Do you have a local betting spot?

The FLAGMAN Sports Platform provides an opportunity to bet on sporting events only on the Internet.

Do I need to verify my account to bet on sports?

You must verify your account to make bets on the site because we need to check user data, including user’s age. You must provide documents required for verification according to the rules of our website and the FLAGMAN Sports Platform.

What should I do if my bet was calculated incorrectly?

If your bet is calculated incorrectly, contact support service. Our staff will check your bet and recalculate it.

What is a margin?

The margin is an indicator that determines the profit of the Sports Platform. Because of the margin, equally likely events never have odds of 2,0 (which seems logical), but for example, odds of 1,9. This 10% difference makes the profit of the Sports Platform, regardless the results of user’s bets.

What does “favourite” mean?

A favourite is the team or player who is most likely to win according to analysts and bookmakers.

What does “outsider” mean?

An outsider is the antonym of the term “favourite”. It is used when describing teams ranked at the bottom of the tournament leaderboards.

Sports and pre-match - Main parameters

Parameter	Value
Sports	Football, basketball, hockey, tennis, MMA and motorsport according to the navigation of the operator's section. Kasynogracz separately describes 54 disciplines, including less common sports and virtual sports.
Leagues and competitions	Ekstraklasa, EPL, LaLiga, Serie A, Bundesliga, Ligue 1, ATP Finals, WTA 125, NHL, NBA, Euroleague, UFC, Formula 1. For the Bundesliga a Bayern Munich - Koln banner is saved.
Line volume	In the Esports snapshot at 20.11.2026 21:25:11 UTC+4 - 198 events: 38 live and 160 Upcoming. Separate discipline filters are available.
Depth of the markets	Pre-match Arminia Bielefeld - Magdeburg, Bundesliga 2, 20.11.2026 21:22:39 UTC+4: main 1X2 line and +1,005 additional markets according to the card indicator.
Bet types	Single bet, accumulator and system according to the sports FAQ. Markets include 1X2, double chance, totals and handicap.
Bet builder	Kasynogracz describes Bet Builder as a separate feature. Access to the builder depends on the event; on other markets the regular single-bet or accumulator slip applies.
Odds	Decimal odds 2.31 / 4.70 / 2.20 in the 1X2 snapshot Liverpool - Real Madrid. The slip settings include the odds format and the handling of price or argument changes.
Min. bet	1 PLN for a regular bet according to the Sports FAQ for the Polish currency context.
Max. bet or payout	The Sports Platform maximum is determined for the specific bet. For the Welcome Free Bet, 500 PLN is the corridor for crediting the free bet, separate from the money bet limit.
Esports	Counter-Strike 2, Dota 2, League of Legends, VALORANT, Overwatch 2, Honor of Kings, Crossfire, FIFA and NHL in the saved Esports showcase.
Settlement and void	On a winning money 1X2 the payout equals the stake × the accepted odds. A void is calculated at odds of 1.00. If an event is postponed or stopped without resuming within 48 h, the FAQ states a refund, except for outcomes that had already been determined.
Live mode	Sports → Live, Esports → All Live. In the 20.11.2026 snapshot the match tracker and live counters are shown separately.

Sports and pre-match - Additional parameters

Parameter	Value
1X2 margin at a single moment	Liverpool - Real Madrid, pre-match 1X2: (1/2.31 + 1/4.70 + 1/2.20 − 1) × 100% = 10.02% over the 100% sum of probabilities. This is a metric of a single cyber-football line.
Virtual sports	Kasynogracz and Casino Guru list Virtual Sports in the catalogue. In the saved Esports tab simulation competitions FIFA, FIFA.Volta and NHL are shown separately.
Predictions	Kasynogracz mentions prediction bets on the "Oscar". Their categories are separated from sports matches and are allowed only if a selected market is present in the line.
